

WORKHORSE® W62

** Vehicle shown may feature optional equipment.*

WORK HARD. CARRY MORE.

It's what your business is all about – working hard and carrying more. It's why you need a heavy-duty chassis that will do the same – because yours is a roll up your sleeves and get it done type of business. Whether it's laundry, linen, tool, plumbing, delivery or utility, you need a strong platform that you can rely on.

At Workhorse we have that same roll up your sleeves attitude. A relentless determination to create solutions that not only meet your needs, but also give you more choices.

Need a heavy-duty platform?

Workhorse has the industry proven W62, and it's tough as nails. Durable and dependable, with the kind of practical innovations that improve efficiency, reduce your maintenance costs and strengthen your bottom line. And with Meritor® Quadraulic™ brakes and Stabilride™ and Vari-Rate suspensions, the W62 has the performance, maneuverability and toughness you need in the 17,000 – 23,500 lb. GVWR range.

Considering gas as well as diesel?

Only the W62 offers both. The MaxxForce® 7 diesel is a robust, incredibly quiet and fuel efficient engine with longer maintenance intervals to keep your costs down. The legendary GM Vortec® 6.0L gas engine is a fuel efficient and cost effective engine that can serve as an alternative to diesel.

MaxxForce 7 diesel

GM Vortec 6.0L gas

Don't want the complicated mess of SCR?

The W62 can help. To avoid the added pounds, extra equipment and lost payload due to the competitor's SCR diesel, choose a Workhorse and experience a completely different approach to 2010 emissions.

At Workhorse, we're determined to deliver what you need, not what we sell. See your Workhorse dealer today and make a W62 your next heavy-payload walk-in truck platform.
